

Ostrane Group Travel Policy

Reference GRP-TRV-01 · Effective 1 July 2025

Policy owner: Group Finance, Ostrane Group. Effective date: 1 July 2025. Review: annual.

1. Purpose and scope

This policy sets the rules for business travel across Ostrane Group. It applies to all employees of the group and of its subsidiaries, including **Kalyo (France)**, whenever they travel for business purposes: client visits, internal meetings, conferences and training.

Its aims are to keep travellers safe, control costs and reduce the environmental impact of travel. When a video conference can achieve the same result, do not travel.

2. Relationship with local policies

Each subsidiary sets its own caps for domestic expenses, such as meals, hotels and mileage in its home country. For Kalyo employees, these caps are set out in the Kalyo expense and travel policy (POL-NF-01), which remains the reference for travel within France, except air travel.

This group policy is the reference for all air travel, including domestic flights, and for all travel abroad: booking, approval, insurance, per diems, visas, travel safety, carbon reporting and loyalty programmes. Expense claims are submitted through the local expense tool of each subsidiary (at Kalyo, form NDF-03).

3. Booking through the group booking portal

All flights, and all train tickets and hotels for travel abroad, must be booked through **the group booking portal**. Each subsidiary's travel agency is available through the portal (at Kalyo, the Kalyo travel agency) and pays hotels and carriers directly. The portal applies negotiated rates, records every trip for safety purposes and calculates its carbon footprint. For domestic rail and hotels, the portal is recommended; local rules apply.

Book as early as possible, and at least 14 days before departure for flights. Bookings made outside the portal are reimbursed only in exceptional cases (portal outage, urgent change during the trip), with a written explanation.

4. Approval before travel

- **Every flight and every trip abroad** must be approved by the traveller's line manager **before booking**. The portal sends the approval request automatically. Other domestic trips follow local approval rules.
- **Travel outside Europe** (see the zones in section 7) also requires the approval of a director of the subsidiary. At Kalyo, this means one of the managing partners or the Nantes site director.
- Travel to a high-risk country follows the additional rules of section 10.

5. Mode of transport

5.1 Rail first

Rail is the preferred mode of transport when the train journey takes less than 4 hours. In that case, flights are not permitted, except when no suitable train is available or for a documented medical reason.

5.2 Air travel

The class of service depends on the scheduled flight time of the longest single flight, excluding connection time.

Scheduled flight time	Class of service
Under 6 hours	Economy
From 6 to 9 hours	Premium economy
Over 9 hours	Premium economy; business class only with director approval

Choose the lowest available fare that matches the schedule of the trip.

6. Hotels abroad

Hotels abroad are booked through the portal, within the approved rate displayed for each destination city. A hotel above the approved rate requires line manager approval before booking.

7. Per diems abroad

For business travel outside the country of the employing subsidiary, employees receive a daily allowance (per diem) covering meals and small incidental expenses (local transport, tips, laundry). No receipts are required for these expenses. Hotels and transport booked through the portal are not included.

Zone	Countries (examples)	Per diem (EUR per day)
Europe	European Union and EEA countries, Switzerland, United Kingdom	60
North America	United States, Canada	85
Asia	Japan, Singapore, South Korea, China, India	70
Rest of the world	All other countries	55

The per diem is paid for each calendar day spent abroad, including the days of departure and return. It is increased by 20 % in the high-cost cities listed in the portal. When lunch or dinner is provided free of charge (by a client, a conference organiser or an airline), the per diem is reduced by 30 % for each meal provided.

Business meals with clients abroad are reimbursed at actual cost, on receipts and with line manager approval. Expenses paid in foreign currency are converted into EUR at the rate applied by the expense tool on the date of the expense.

8. Travel insurance and 24/7 assistance

All employees travelling abroad on business are covered by the group international travel insurance. It covers emergency medical expenses, hospitalisation, medical repatriation, loss or delay of luggage and personal liability. Download your insurance certificate from the portal before departure.

A 24/7 assistance service is available around the clock for medical emergencies, lost documents, security incidents and urgent rebooking. Its number is printed on the travel card available in the portal. For trips within the European Union, also carry your European Health Insurance Card.

9. Passports and visas

Travellers are responsible for holding a valid passport. Check that it remains valid for at least 6 months after the planned return date. Visa and electronic travel authorisation fees are reimbursed; apply through the visa service of the portal at least 4 weeks before departure. Passport renewal fees are not reimbursed.

10. Travel safety and high-risk countries

Group Security publishes a risk level for every country (low, medium, high or extreme), available in the portal.

- **High risk:** the trip requires the approval of a director of the subsidiary (see section 4) and of Group Security at least 10 days before departure, and a safety briefing before departure.
- **Extreme risk:** business travel is not permitted.

Every trip booked through the portal is tracked, so that the group can contact travellers during a crisis. Employees may decline a trip to a high-risk country without any consequence for their career.

11. Carbon footprint reporting

The portal calculates the carbon footprint of each trip. Each subsidiary reports its business travel emissions to Group Sustainability every quarter. The group target is to reduce emissions from business travel by 30 % by 2030, compared with 2019.

12. Loyalty programmes

Employees may keep the loyalty points earned on business trips for personal use. Points must never influence the choice of carrier or hotel: the lowest compliant option is always chosen. Upgrades paid with personal points are allowed.

13. Combining business and personal travel

Personal days may be added to a business trip with line manager approval. All additional costs are paid by the employee, and the group insurance does not cover these days. Working remotely from

abroad before or after a business trip is subject to local telework rules; at Kalyo, telework from abroad is not permitted (see the Kalyo telework agreement).

14. Questions

Kalyo employees can ask questions about this policy by opening a ticket in the HR portal (espace RH), category "Notes de frais".
